

INSANE PATIENTS SOON TO GO OUTSIDE

Marshal Love Is Perfecting Arrangements to Send the Four Unfortunates to Oregon Asylum as Soon as the Grand Jury Takes Action in the Case of Mrs. Blanche Duvall—Deputation With Marshal and Guards Will Make Large Party.

As soon as the grand jury has disposed of the case of Mrs. Blanche Duvall, the insane woman who is now held here on the charge of killing former Chief of Police Al Miller, a special deputation under charge of a deputy United States marshal and a number of guards will be sent over the ice, conveying the four insane patients that are now in the federal jail here to the insane asylum in Oregon.

In the case of Mrs. Duvall, the action of the grand jury will probably be a formal acceptance of the verdict of the jury that officially declared the woman to be insane shortly after the crime was committed.

Although a preliminary hearing was had before Commissioner Miller, and the woman arraigned on the charge of murder, the subsequent hearing before the insane commission will doubtless supercede the order of the court binding her over to the grand jury.

Marshal Love stated today that he was now perfecting plans for sending the patients outside and that they will go over the trail shortly after the first of the year, if no hitch occurs in court proceedings.

Besides Ms. Duvall, there are three men here who have recently been de-

clared insane, but against whom there are no charges. Of these William Winters is thought by the medical authorities to be only partially unbalanced, and in such a condition that the right sort of treatment in a sanitarium might restore his mental condition.

John Nelmi and Andrew Svensrud are likewise susceptible to the right sort of treatment, with good chances of at least partial recovery. The fact that these unfortunates cannot be properly treated here, makes the matter all the more urgent, and no time will be lost in getting them to the insane institution.

When the party is made up it will consist of a deputy marshal, a matron to look after Mrs. Duvall and several guards, as it is necessary that a day and night guard be maintained all the time.

Mr. Love stated that he would depute such guards as wanted to go outside and were willing to undertake the delicate task of handling the patients. These men will, of course, be paid their expenses and a per diem for the trip, and it affords an opportunity for those who are desirous of getting out, if they are of sufficient responsibility to meet the marshal's requirements.
